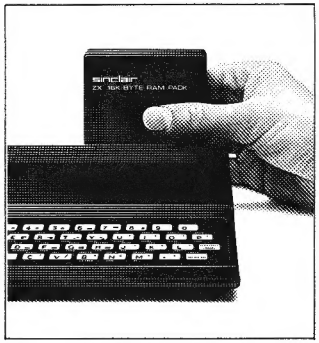
Improve your memory.

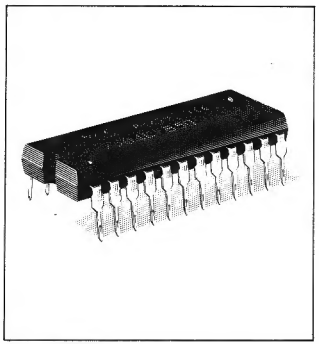


16K Memory Module

The16K Memory Module is required for many of the Sinclair Software Programs. But you'll probably want it anyway, because it gives your ZX81 or ZX80 computer 16 times more memory to work with. Use it for program or data storage.

Simply plug the Memory Module onto your ZX81 or ZX80. Then get ready for even more challenging fun.

Gain more power.



Extended BASIC

If you own a ZX80, you will need the Extended BASIC chip to run Sinclair Software Programs. (The ZX81 has Extended BASIC built in.) The Extended BASIC package includes the chip, along with a new keyboard and a new easy-to-understand operating manual.

16K Memory Module or Extended BASIC chip must be ordered separately from software orders. **Call Toll-Free 800-543-3000.** Ask for operator #509. In Ohio call 800-582-1364; in Canada 513-729-4300. Ask for operator #509. Have your MasterCard or VISA ready. Phones open 24 hours a day, 7 days a week. Please note that these numbers are for orders only. To order by mail you must send the coupon below along with check or money order payable to Sinclair Research Ltd.
